You want to establish an Information Technology Park somewhere in Pokhara. Write a proposal to the Information Department, Ministry of Information and Technology, Kathmandu, Nepal.

PROPOSAL TO ESTABLISH AN INFORMATION TECHNOLOGY PARK IN POKHARA

Prepared for
Ministry of Information and Technology,
Information Department,
Kathmandu, Nepal

Prepared By
Bijay Shrestha, HOD,

November 7, 2020

EXECUTIVE SUMMARY

Nepal is moving towards computerized techniques in most area, so foundation of Information Technology Park which will give different of information identified with innovation will help impending age, just as old age to find out about innovation and its need just as inspire individuals and include in such field.

To improve Sector of IT and its innovation, it is a need to have such park in a nation. Many created nations have set up such park to inspire individuals and make them engaged with such field. So we need to set up this park.

The expense to establish this Park may takes around 99 crore rupees which includes cost of land some place in Pokhara and furthesmore incorporates different materials needed for the Park. It will improve standard of Information Technology in Nepal.

INTRODUCTION

Problem

As Nepal is moving towards advancement in the field of Information and innovation, the necessity to set up IT park is met. Individuals cant comprehend about IT and furthermore those we are occupied with IT are not getting legitmate climate to show their ability and aptitudes.

Solution

Problem clarified above can be wiped out on the off chance that we set up IT Park some place in Pokhara in light of the fact that it lies in focus of Nepal just as it is a renowned place of interest. So tech crack individual can go there effectively just as outsides will be astonished to see such Park in non-individual industrial nations like our own and will help Nepal know as a nation progressing towards digitization.

Objectives

The purpose behind this proposal is to improve the norm of IT in Nepal and give individuals to learn and show their ability in referenced field.

Background

Our exploration shows that numerous individuals are obscure about what is the significance of such park and the individuals who have talented are not getting appropriate stage to show their aptitudes. So foundation of IT park is must.

Data Sources

The data came from our research conducted by our staff.
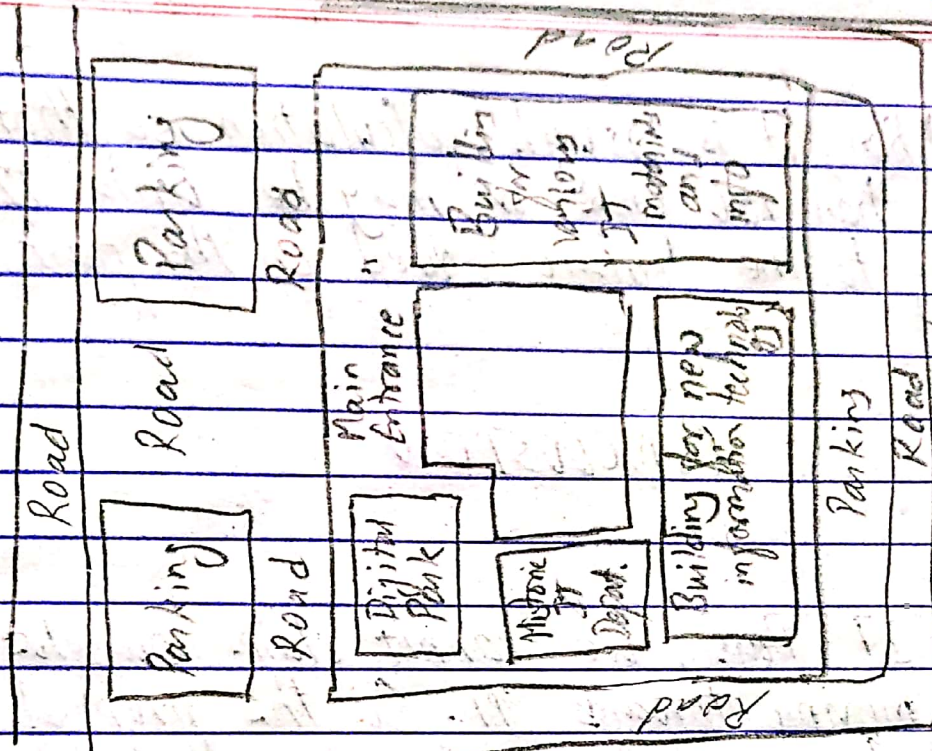

Scope and Limitations

In seeking solutions, we came up to know that establishment of IT park will surely have many positive impact on the lives of Nepalese citizens. We also considered cost and energy consumption.

DISCUSSION

Methods

To determine what is required in park we view the concept of silicon valley and rough sketch of the park that involves following things as in figure.

The diagram shows a site plan with the following labels: Road, Parking Road, Road, Main Entrance, Building for going vehicles, Digital Park, Welcome IT Dept., Building for new information technology, Parking Road, Road.

Scheduling

Once the area, land, required materials has been received the project should take less than 10 years to complete.

Materials and Equipment

We can purchase various digital and advance information technology materials, the rough calculation shows that 30 crore is required to buy essential materials for the Park and additional 20 crore to update the technology in coming days. Equipment such as computers, servers, database, lights etc are required.

Cost

The following budget details shows the expenses for this project.

Land 100 ropani	25 crore
Equipments + Materials	40 crore
Labour & Service fee	30 crore
	95 crore

In addition, it is rough calculation so that cost may be less than 100 crore or may be upto 120 crore according to the feature added on the park in future.

CONCLUSION

Without IT Park, we cannot claim ourselves to be a country moving towards IT. So this proposal is the proposal to make Nepal advanced and digital Nepal in all by making individuals mindful about IT.

The cost 100 crore (or 120 crore whenever added other features) is less in contrast with the need of current condition in the area of IT in Nepal to make new just as old age educate about innovation and its significance in coming future. This park will improve IT area in Nepal at a sensible expense.
